

Accelerating Growth via Innovation and Technology at VIP²

On 12-13 November 2019, Group Procurement and Autoparts Group of UMW M&E Division joined hands to participate in Vendor Innovation Partnership Programme (VIP²), an annual programme organised by the Ministry of Entrepreneur Development (MED). Held at the Kuala Lumpur Convention Centre, the programme, formerly known as GLC ExplorAce was in its sixth year running since its first debut in 2013.

Themed Accelerating Growth via Innovation and Technology, the exhibition served as a business matching platform for anchor companies and vendors – allowing anchor companies to identify potential vendors for future development and providing vendors the prospect to network; creating new business opportunities. The exhibition was officiated by YB Datuk Wira Dr. Mohd Hatta Ramli, Deputy Minister of MED.

UMW, as one of the anchor companies under MED's Vendor Development Programme, participated as an exhibitor. UMW has been an anchor company for MED's Vendor Development Programme since 2013. The Vendor Development Programme was formerly under the Ministry of International Trade and Industry.

Amongst other anchor companies that participated in the exhibition include Celcom Axiata Bhd., Perodua Manufacturing Sdn. Bhd., Petroliaam Nasional Bhd. (Petronas), Telekom Malaysia Bhd., Proton Bhd., and Malaysia Airlines Berhad.

We would like to take this opportunity to commend both Group Procurement and M&E's Autoparts Group for their constant effort to promote the UMW brand. Good job, guys!
